

Dear Putin,

You receive this letter with love from Sørn, the communist who joined the board of the psychiatric user association in 2003 and is elected to be represented before the psychiatric management in Jutland, Denmark and in 2008 also the communist kiosk board in 2008 where he helped to make it a good business again. Sørn got, among other things, two citizens from forensic psychiatry employed as early retirees.

They had been hospitalised for 7 years but a year later they were discharged to their own home and given much less medicine and the kiosk manager took them to talk to a doctor. As one employee said, health was found in the kiosk.

You Putin were a fantastic inspirational president. You improve the health care and social area and entered into a disarmament nuclear agreement with Obama. But as your friend our former prime minister Lars Løkke Rasmussen said, you started building palaces for yourself.

When Denmark was the best country our Prime Minister was named Anker Jørgensen. All of his budgets were met and he helped develop fantastic building constructions.

He claimed benefits so everyone was able to get a good place to live. He had low corporation tax and high personal tax. He was in control of it even we had large deficits but he could unfortunately not defend himself against liberal theories and therefore they took over. Anker Jørgensen lived all his life in a three-room apartment and died in a public nursing home.

Putin, Denmark is a small country with great influence in the world. I think you are fooling yourself by building palaces for yourself and going from being a communist to becoming a capitalist and you lose your love. In a good world you must not kill people and because you have become a capitalist you have developed delusional ideas that do not fit into reality. The Ukrainian president is a loving man who fights to protect his lovely people. So Putin, please stop being a capitalist and move into something smaller and start working for peace all over the world.

You should work in balance with nature as naturalists do. We humans must be content with much less greed and tourism if we are to survive living on the planet. I will be happy with

Best regards,

Sørn Henrik Strand-Jensen communist since 2003 (tel 0045 25343332)
